

Year 4/5 & 5/6 Term 4 2026

Curriculum Newsletter

Welcome to Term 4, 2026!

We hope all our families enjoyed a relaxing break. As we begin the final term of the school year, we would like to remind families that Gracemere State School is a Positive Behaviour for Learning school. We continue to have high expectations for all students to follow **Our Best Always** and uphold our **5 A's**.

English

In Term 4, students will explore poetry, focusing on imagery, sound devices and meaning. They will practise identifying main ideas and key details, making inferences, and comparing poems with other texts to understand how authors create meaning.

HASS

Students are exploring how people and environments influence each other by comparing Sweden and Mexico. They are using maps and data to identify patterns and relationships. Students are also creating business ideas that could benefit people in their community.

Maths

Students are building their number skills by working with decimals, factors, multiples, fractions, and percentages to solve problems and explain their thinking. They are also exploring chance and probability by predicting, testing, and comparing how likely different events are to happen.

Health

Students will learn about the changes that happen as they grow and develop. They will explore positive strategies to help them manage new experiences, challenges and transitions as they get older.
