

3/4 TERM 2 NEWSLETTER

English

This term, students will create and present a spoken procedure in the role of a character from a story, where the character is explaining how to do something.

We will be reading the novel: George's Marvellous Medicine and analysing the characters. Students can then choose a character to become for their presentation to create their very own marvellous medicine!

Science

Welcome back to term 2. This term year 3 & 4 students will be learning about Earth and Space Sciences. In the unit, Spinning Earth, students will use their understanding of the movement of Earth to suggest explanations for everyday observations such as day and night, sunrise and sunset and shadows. They will identify the observable and non-observable features of Earth and compare its size with the sun and moon. They will make observations of the changes in sunlight during the day and investigate how Earth's movement causes these changes.

Mathematics

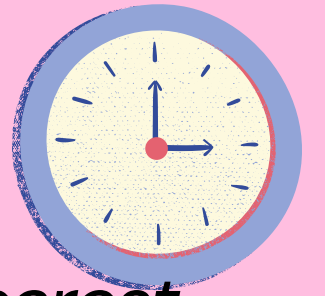

Statistics and Probability

Year 3: Conducting a chance experiment

Year 4: Identifying and explaining chance events

Time: Measurement and Geography

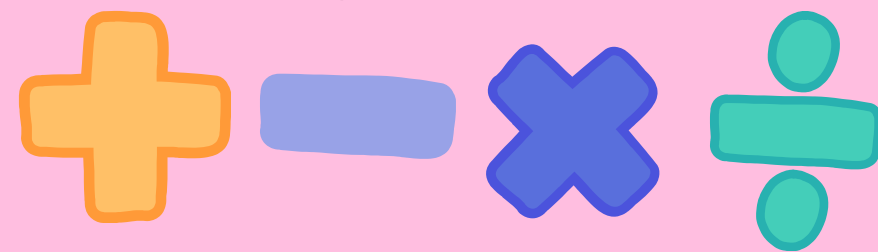

Year 3: Telling time to the nearest minute

Year 4: Time units and duration

Number: Number and Algebra

Year 3: Patterning and connecting addition and subtraction

Year 4: Investigating odd and even numbers and multiplication patterns, and finding unknown quantities

HASS

Students will be exploring the roles of rules and making democratic decisions in the school community.

They will investigate a commemoration important to them and explain how it has changed over time. This will be assessed over the semester.
